Data presented in this report are subject to suppression and random rounding in order to preserve the confidentiality of respondents to the census. The effect is significant in areas with little population or where a particular category drew few responses.

The census is a rich source of demographic data for even small communities, at five year intervals. The information presented here is drawn from a large dataset. Other variables are available by request on a fee for service basis.

Notes

Population - effective since the 1991 Census, non-permanent residents included in total population.

2001 Census population - based on 2006 boundaries.

Economic family - refers to two or more persons living in the same dwelling, related to each other by blood, marriage, common-law or adoption.

Experienced labour force - includes persons who worked since Jan 1, 2005 and who were employed or unemployed during the reference week.

Non-movers - on Census Day were living at the same address as one or five years previous.

Non-migrant movers - lived at a different address but in the same census subdivision (CSD).

Average - or arithmetic mean is calculated by dividing the sum of included categories by the number of included categories.

Median - an alternate measure of 'averageness'. Median income of a specific group is that amount which divides their income size distribution into two halves (below and above the median).

Prevalence of low income - the percentage of a specific group below Statistics Canada's low income cut-offs (LICO).

Data presented in this report are subject to suppression and random rounding in order to preserve the confidentiality of respondents to the census. The effect is significant in areas with little population or where a particular category drew few responses.

The census is a rich source of demographic data for even small communities, at five year intervals. The information presented here is drawn from a large dataset. Other variables are available by request on a fee for service basis.

Refers to those persons who reported identifying with at least one

Aboriginal group, that is, North American Indian, Métis or Inuit, and/or those who reported being a Treaty Indian or a Registered Indian, as defined by the *Indian Act* of Canada, and/or those who reported they were members of an Indian band or First Nation.

In 1991 and previous censuses, the Aboriginal population was defined using the ethnic origin question (ancestry). The 1996 Census included a question on the individual's perception of his/her Aboriginal identity. The question used in the 2006 and 2001 censuses is the same as the one used in 1996.

* Chinese (All *) category is calculated as the sum of Chinese, n.o.s. (not otherwise specified), Cantonese, Mandarin, and Taiwanese. A full accounting of Chinese languages would include additional languages, such as Fukien, Hakka, Shangainese, and Chaochow which will be included in the 'Other languages' category of this report. The effect of this is relatively insignificant but readers may wish to understand why other census sources may contain different figures.

Revision 3, August 2008 - **Education** chart box title, incorrectly spelled. Now corrected.

Revision 4, November 10, 2008 - Stub changes per user suggestion (clarification). Changes made but details not recorded.

Revision 5, March 5, 2009 - **Affordability** table (page 3 if Age Pyramid chart available, otherwise page 2) - The number of tenant and owner occupied one-family households were picking up same data as total number of all households (data line 1 of this table). Now corrected.

Low Income (page 30 if Age Pyramid chart available, otherwise page 29) - The Prevalence of low income, both before and after tax, for male and female lone-parent families were picking up data for all economic families and couple economic families, respectively. Now corrected.

Revision 6, August 24, 2009 - Corrections to map reference for CD/CSD and Designated Places on cover page, other minor corrections.

Revision 7, May 13, 2010 - Chart Labour Force by Top 8 Industries corrected. Was showing industries ranked 2 to 9 rather than 1 to 8. Also, cosmetic adjustment to selected charts for labels missing after software upgrade.
